25X1A

2. Howard Osborn called about arranging a meeting with the Director to review the security features he wants in his new residence. The Director has already expressed a special interest in locks and gave Colonel White a brochure which he will forward to the Office of Security for their review.

3. I met with Dr. Tietjen and discussed among other things the appointment of his Deputy. It had been previously agreed that [REDACTED] would become the Deputy Director of Medical Services, and I informed Colonel White of the selection. He in turn will mention this to the DDCI. I agreed with Dr. Tietjen that we would not consider this a fixed appointment but that the Deputy position would be available for change as special assignments for the Deputy occur or the Deputy leaves on a sabbatical for refreshment. We arrived at this decision because of the several competent officers who can fill this position, such as [REDACTED]

4. At the Executive Committee Meeting this morning I reported on the final report of the 5 July crash of the Air America Beechcraft C-45 at Saigon in which the pilot and two passengers were killed. The findings indicate that the crash resulted from a ground airburst near the left wing or an explosive charge placed on the outer surface of the left engine. The Director reaffirmed the need for precautions against sabotage.
